

# TeliSIM™

Hosted White Label MVNO Solution

## Run your own MVNO Business for Travelers

TeliSIM™ enables you to run your own MVNO business for global roaming for mobile data, eSIMs, and an option to add a brandable mobile app. Users merely scan a convenient QR code with an eSIM-capable phone to begin using your service, without changing SIM cards. In addition to mobile data, you can also offer voice and video calling “over the top” via our brandable TeliGlobe™ mobile softphone app for both Android and Apple iOS. Offer both SMS and MMS, plus free on-net messaging. Multiple local phone numbers from your own DID providers can be used, as many different phone numbers as your user needs. TeliSIM includes roaming agreements with more than 500 mobile operators in over 100 countries around the world, and is specially designed for travelers while temporarily outside their homecountry.

TeliCore™ is our robust carrier-grade platform, integrating Telinta's cutting-edge VoIP solutions with world-class Switching and Billing capabilities. With Telinta's highly-customizable white label solutions, you and your resellers can offer a full range of services in addition to TeliSIM, all under your own brand.

Cloud-based, rapid deployment,  
with no capital investment

Your own VoIP Termination  
providers

Unlimited Phone Numbers  
via your DID providers
