Virtual Numbers

Virtual Number Solutions for your VoIP Business

Provide Virtual Numbers to your Users Around the Globe

Virtual Numbers enables you to offer a DID that is not associated with a physical phone line. Via a brandable web portal, your users can set calls to be forwarded to either a VoIP service or to a different phone line. Our Virtual Number solution allows any person or business to be easily reachable via local calls, no matter where they are. Your business user can have a local presence in multiple locations, while individual users can easily keep in contact with friends and family. Calls can ring at multiple locations in a specific order or simultaneously. Route calls by time of day and day of week. You and your users can view Call Detail Records online in real time.

TeliCore™ is our robust carrier-grade platform, integrating Telinta's cutting-edge VoIP solutions with world-class Switching and Billing capabilities. With Telinta's highly-customizable white label solutions, you and your resellers can offer a full range of services in addition to Virtual Numbers, all under your own brand.

Cloud-based, rapid deployment, with no capital investment
