

Encrypted VoIP

Hosted White Label Solutions for VoIP Service Providers

Encrypted VoIP for ITSPs

Telinta offers you optional encryption to help safeguard your VoIP traffic. This solution includes options for IPsec VPN tunnels to use with your VoIP Termination carriers for SIP signaling, plus an additional option for encrypting both SIP signaling using Transport Layer Security (TLS) and media using Secure Real-time Transport Protocol (SRTP) with our brandable TeliGlobe™ Mobile Softphone solution. Telinta's Encrypted VoIP solution provides you and your customers with the peace of mind that your traffic is protected by state of the art encryption technology. This also helps you meet the high standards of security that some VoIP Termination carriers and end user businesses may require. Our brandable Desktop Softphone and WebRTC include free TLS/SRTP encryption as a standard part of these solutions.

TeliCore™ is our robust carrier-grade platform, integrating Telinta's cutting-edge VoIP solutions with world-class Switching and Billing capabilities. With Telinta's highly-customizable white label solutions, you and your resellers can offer a full range of services in addition to Encrypted VoIP, all under your own brand.
